

Masterplast Linopore RX roof foils with adhesive tape offer a seamless and efficient solution for ensuring the wind and water tightness of roofing structures.

Underlay RX+ 1,5m*50m - 75m²

**Product range: Masterplast Linopore RX product line (RX 5000+ - RX9000+)
or/
Private branded, custom underlay 130 g/m² – 210 g/m²)**

The purpose and value of the adhesive tape:

A layer for windproof gluing of roof foils, ensuring surface continuity.

After installation, it prevents the inflow of air even at a low angle of inclination, and improves the wind and water tightness of the roof structure.

Its advantage:

- 1. Easy installation: The roof film with adhesive tape can be installed easily and quickly, there is no need to use a separate adhesive**
- 2. Weather resistance: Roof foil with adhesive tape is resistant to weather conditions**
- 3. Watertightness: The roof film with adhesive tape has waterproof properties**
- 4. Strength and durability**
- 5. Energy efficiency**
- 6. double-sided adhesive strip on the roof foil**

1. illustration: 9 cm of glue on the lower layer (left side), 1 cm from the edge of the roof foil.

2. illustration: 10 cm wide silicone tape covers the glue.

3. illustration: 4,5 cm of glue on the top printed layer (right side) 4 cm from the edge of the roof foil.

4. illustration: 6 cm wide silicone tape covers the glue.
